

102-30-55  
Moira Sound - Dickman  
10-18-73  
Novak & Downey

This short stream is an estimated 100' in length, between the ITZ and the lake. The system, under natural conditions has no fishery potential due to the rapids, falls situation of this stream.

Transplanting of sport and commercial species may be merited in this system. Rearing coho fry may be one consideration-

Optimum escapement - No spawning potential.

STREAM ENVIRONMENT NORM

Observers: Dinneford, Andersen

Date: 9-26-73 Signature: 2:30

Temperature: Weather: high clouds 2:30

Name: Dickman (in Bay)  
Number: 102-30-53
